

Formulation Sample

Natural Origin Lipstick with **NATURAL SYNERGY WAX SFC**

Formulation No.:>NNLIP002

Almost all of the ingredients in this lipstick are natural (total NI: 0.88; NOI: 1.00, according to ISO 16128). **NATURAL SYNERGY WAX SFC** is a special natural wax that solidifies oil well, even triglyceride oil, which does not solidify strongly with common natural waxes. Since vegetable oils are generally composed of triglycerides, SFC is useful for creating natural lipsticks with vegetable oils, like this one.

Product Name	INCI Name	wt%
A	Camellia Oleifera Seed Oil	22.0
