

Formulation Sample

Non-Aqueous Waterproof Eyebrow Gel Cream

Formulation No.: PEL-W001

This eyebrow gel cream can dry quickly and form a waterproof film. It is useful for swimming and exercising as it is difficult to remove with water. Please use a cleansing oil to remove it.

FILLER WAX P gels this formulation, and **FILLER WAX RP3010** adjusts the hardness. These waxes do not interfere with the volatilization of the oil and allow for quick drying.

	Product Name	INCI Name	wt%
