

Formulation Sample

Non-Greasy, Non-Sticky Cream Concealer

Formulation No.: CON-W002NP

HYBRID WAX CS-20 is a blend of Carnauba wax and synthetic wax. These waxes are blended in the best ratio to solidify any oil stably. The cream concealer with CS-20 has a creamy and rich feel. After it is applied to the skin, the feel changes from creamy to powdery. **AMYLOPECTIN POWDER F**, a 100% vegetable powder, is added to reduce stickiness and blend naturally with the skin.

Product Name	INCI Name	wt%
A	Triethylhexanoin	8.0
	Squalane	8.0
	Simmondsia Chinensis (Jojoba) Seed Oil	8.0
