

Formulation Sample

Smooth Lipstick with **HYBRID WAX CS-20** (Natural Oil / Synthetic Oil)

Formulation No.: LS-W006NP / LS-W005NP

HYBRID WAX CS-20 is a blend of Carnauba wax and synthetic wax. These waxes are blended in the best ratio to solidify any oil stably. You can make a lipstick with sufficient strength and soft feel by using only CS-20. In addition, the dosage required to solidify the oil is relatively small. It can also be used as an alternative of petroleum wax such as Ceresin, Ozokerite and Microcrystalline wax.

Natural Oil Version (LS-W006NP)

Product Name	INCI Name	wt%
A	Ricinus Communis (Castor) Seed Oil	30.0
	FLORA GREASE J	
	Euphorbia Cerifera (Candelilla) Wax Extract (and) Simmondsia Chinensis (Jojoba) Seed Oil	20.0
